

**Table 6.**  
**Total California Health Care Expenditures in 2017 under Existing System with Full Universal Insurance Coverage**

|   |                         |
|---|-------------------------|
| 1. Total 2017 Expenditures  | \$368.6 billion         |
| <b>Current Insurance Coverage</b>   |                         |
| 2. Number of insured  | 33.4 million<br>(92.5%) |
| 3. Total covered expenditures per insured<br>(= \$368.6 billion/33.4 million people)                            | \$11,035.00             |
| <b>Full Coverage for Underinsured</b>   |                         |
| 4. Percent underinsured   | 36.00%                  |
| 5. Underinsured spending, as % of full access spending<br>(figure weighted by age distribution of underinsured) | 87.00%                  |
| 6. System-wide cost increase for underinsured to receive full coverage  | \$19.8 billion          |
| 7. Average expenditure if zero underinsured<br>(figure weighted by age distribution of underinsured)            | \$11,629.00             |
| <b>Full Coverage for Uninsured</b>  |                         |
| 8. Number of uninsured  | 2.7 million<br>(7.5%)   |
| 9. Current system-wide costs for uninsured health care provision<br>(= \$5,814 x 2.7 million people)            | \$15.7 billion          |
| 10. System-wide cost increase for uninsured to receive full coverage<br>(= row 9 x 2)                           | \$15.7 billion          |
| <b>TOTAL SPENDING WITH UNIVERSAL COVERAGE</b><br>(= rows 1 + 6 + 10)  | <b>\$404.1 billion</b>  |
| <b>PERCENTAGE INCREASE IN TOTAL SPENDING WITH UNIVERSAL COVERAGE</b><br>(= (row 11 - row 2)/row 2)              | <b>9.60%</b>            |
